

## SPECIFICATION

LIQUID PROCESSING DEVICE AND METHOD OF MANUFACTURING PROCESSED  
LIQUID

## 5 FIELD OF THE INVENTION

The present invention relates to a liquid processing device comprising an arrangement of material pieces of which shape is a hexagonal prism. Further, the present invention relates to a method of manufacturing processed liquid which utilizes the liquid  
10 processing device.

## BACKGROUND ART

As a space that improves vitality of human beings, Japanese Patent Laid-Open No. H7-4084 disclosed treatment room for patients,  
15 which is surrounded with boards having through-holes of hexagonal shape.

The above mentioned treatment room needs large capacity surroundings for the space expecting conversion and also big facilities. In addition they require significant labor to make.

20 It is an object of this invention to obtain a liquid processing device that is capable of converting processing liquid into suitable one for human beings, animals and plants. Other object of this invention is to provide a method of manufacturing processed liquid, which is suitable one for human beings, animals and plants.

25

## SUMMARY OF THE INVENTION

An embodiment of the present invention is a liquid processing device. The liquid processing device comprises a container and arrangement(s) of hexagonal material pieces. In this specification,
